

# PEPreference

## The Renewable Innovation

From bio-based feedstocks via di-acids to multiple advanced bio-based materials with a preference for polyethylene furanoate

This project receives funding from the Bio-based Industries Joint Undertaking (JU) under the European Union's Horizon 2020 research and innovation programme under grant agreement No 744409. The JU receives support from the European Union's Horizon 2020 research and innovation programme and the Bio-based Industries Consortium.
